

Temporary works are usually safety and business-critical and require careful co-ordination.

Course Summary

Certification: 

Duration: 2 DAYS

Valid for: 3 YEARS

Cost: £500 ex VAT **NON-MEMBER:** £650 ex VAT

Details

Temporary works are usually safety and business-critical and require careful coordination. An accepted way of achieving this is through the adoption of the management process outlined in BS5975, which introduces the temporary works co-ordinator (TWC) as a key figure. This course explains the role and the overall management context within which it sits (CITB Scheme Rules).

The contents of the course include:

- an exploration of relevant legislation and best practice as outlined by BS5975
- consideration of the nature of temporary works and associated risks; analysis of failures
- the use of a case study to illustrate aspects of the role

Swanton Consulting Ltd is an approved Training Provider on behalf of CITB-Construction Skills for this course.

Who should attend

This two-day course is designed to assist those on site who have responsibility for managing all forms of temporary works' (CITB Scheme Rules). The course is aimed at those who have been nominated by their company to act as temporary works co-ordinator. These individuals will have either engineering qualifications or site experience of temporary works, or both. The course is also relevant to those who have been nominated to act as temporary works supervisors and who may, in due course, act as temporary works co-ordinators.

Course assessment and certification

This course is assessed by multiple-choice questions at the end of the second day as well as the delegate being expected to be interactive during the course. A certificate will be issued by CITB on successful completion of this course.
